

Technical features on PEAK 12 crampons

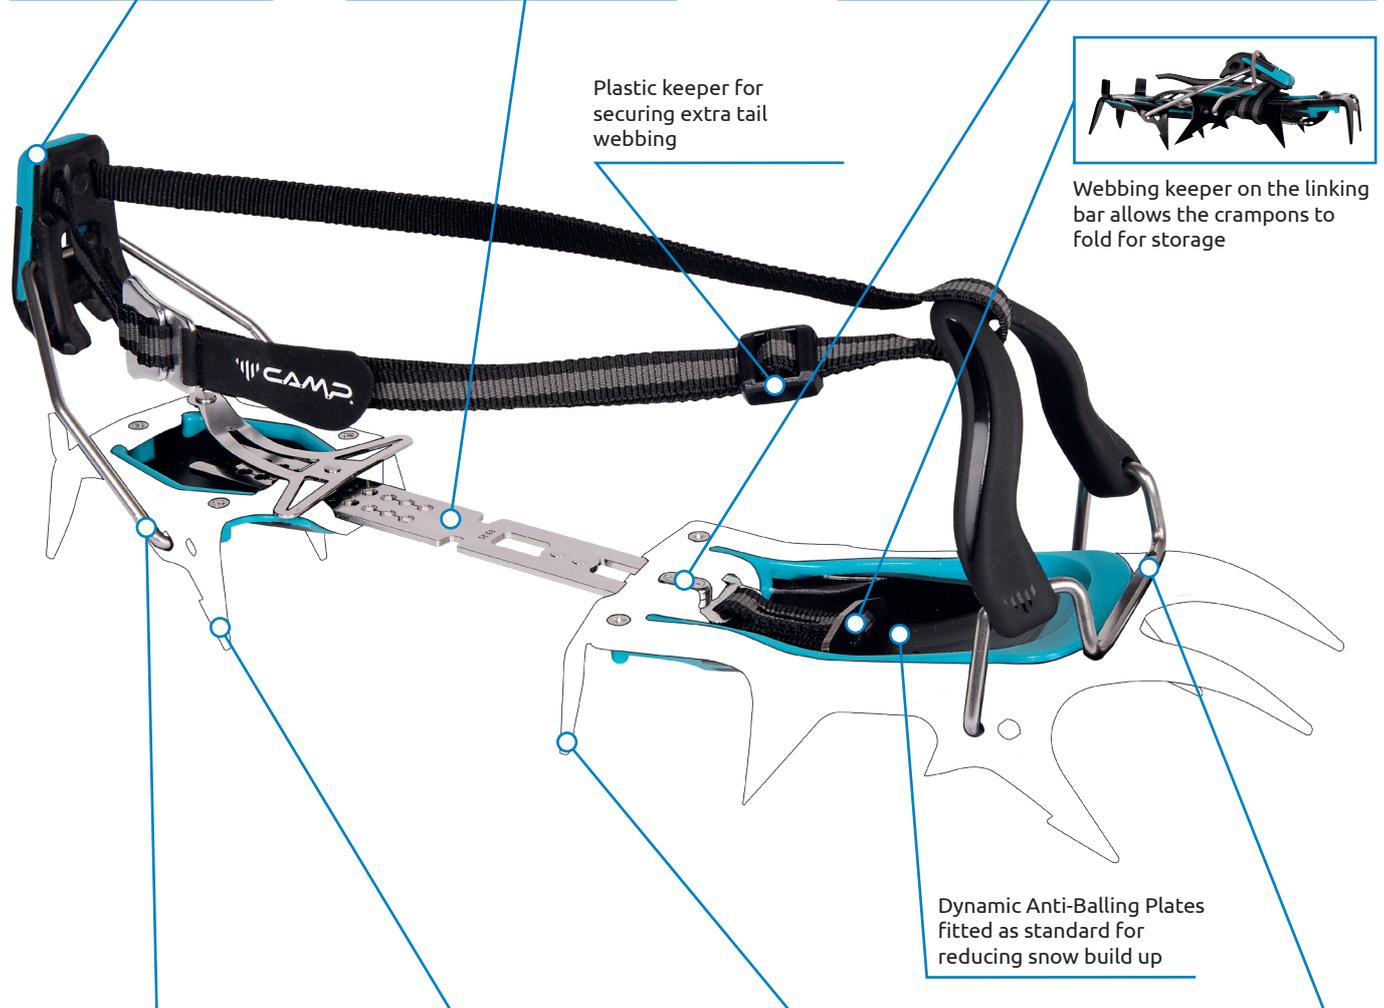

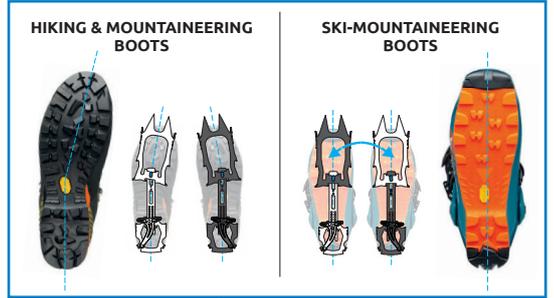

2 positions for heel bail and a compact lever with 3 positions for a secure fit

Innovative linking bar with micrometric length adjustment can be set in two positions to cover large and small boots without protruding from the back of the crampons

BOOT ADAPT SYSTEM (Pat. Pend.) for a precise fit on both mountaineering and ski boots

Plastic keeper for securing extra tail webbing

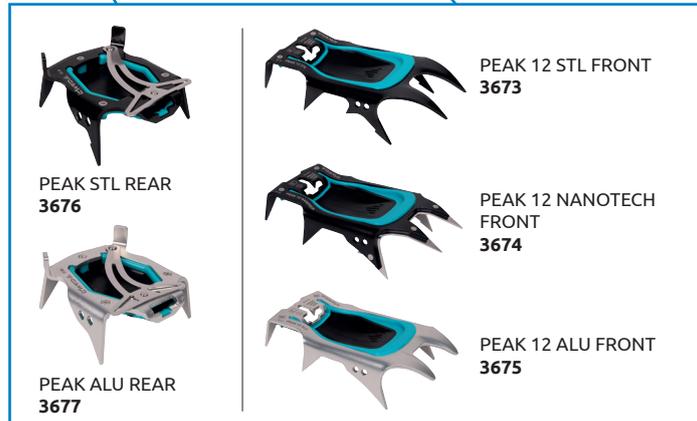

Webbing keeper on the linking bar allows the crampons to fold for storage

Dynamic Anti-Balling Plates fitted as standard for reducing snow build up

PEAK UNIVERSAL HEEL BAIL ref. 3683

Can be purchased separately for full universal fit

PEAK STL REAR 3676

PEAK ALU REAR 3677

PEAK 12 STL FRONT 3673

PEAK 12 NANOTECH FRONT 3674

PEAK 12 ALU FRONT 3675

Equipped as standard with components for Auto and Semi-Auto fit

Peak 12 parts and components are fully modular and interchangeable making them completely customizable
